

A CLEARER VISION FOR THE PERFECT FINISH

pegasus

semi-automated B2 laminator

The Pegasus is an entry-level laminator capable of running sheets up to B2 size. It can be supplied as a semi-automatic laminator with automatic separation or, with its modular feeder, can be supplied as a fully automatic line to suit all needs.

A CLEARER VISION FOR THE PERFECT FINISH

pegasus

semi-automated B2 laminator

A modular feeder can be added at any time to give a fully automated laminator. The suction feeder offers a deep pile for longer run work and is easily adjustable for a variety of different sheet sizes.

A film splitter is provided to allow non-standard sheet sizes to be run when using a wider standard width film, reducing the need to carry stocks of non-standard film widths.

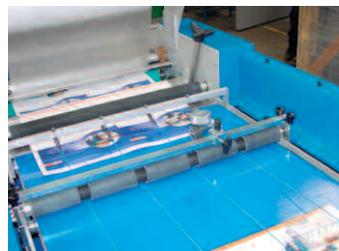

A 'missing sheet' detector stops the laminator if no sheet is detected helping to avoid messy wraparounds.

A decurl bar, which may be altered on the run, is fitted to assist in giving a flat result.

A simple control panel allows speed and temperature to be adjusted to suit the work being run.

The automatic sheet separator is adjustable to separate any size of sheet up to B2 and allows the laminator to be run by a single operator.

The film mandrel is capable of accepting both 25mm and 76mm core sizes.

When utilising an automatic feeder the film can be adjusted laterally on the run to minimise waste and down time.
